Epidemic Warning Standards and Guidelines

(1) Random Cases of Community Transmission from Abroad	(2) Local Cases of Unknown Sources	(3) More than 3 cases of community transmission in one week, or more than 10 confirmed local cases of unknown sources in one day	(4) Rapid increase of local confirmed cases (a daily average of over 100 confirmed cases for 14 days) and the infection chain of half of the cases cannot be identified.
--	------------------------------------	--	--

Wear face masks all the time when taking mass transportation and entering crowded public areas.

Those who do not wear face masks will be fined.

Outdoor activities of more than 500 people and indoor activities of more than 100 people should be canceled.

Organizers of gatherings and activities should adopt measures that ensure social distancing and mask-wearing, use partitions, keep a record of participants' contact information, take temperatures, sanitize environments, and institute crowd flow control, capacity limits and route arrangement. Organizers failing to adopt these measures should cancel their activities.

Business and venue management units should keep a record of customers' contact information, adopt social distancing, sanitize environments, and take temperatures and measures to fight the disease.

Business owners should activate crowd flow control measures, and those failing to take these measures should suspend their business. When necessary, entertainment and leisure businesses and public areas will be closed.

In communities with cluster infection, residents should follow virus screening procedures if necessary to contain the virus. Residents should not leave the contained areas without permission. All gatherings, activities and classes should be suspended.

Enforce area lockdown for towns, villages, cities and counties with severe transmission of the virus. Lockdown zones should be specified to control crowd flow. Residents should stay home.

CECC will follow the guidelines according to the epidemic transmission condition.
